CONTACT CENTER & SERVICE EXPERIENCE TRANSFORMATION

PMP, Prosci Certified · alexis.brochu@gmail.com · North Conway, NH · Remote-Hybrid · 401.302.1127 · upstart-labs.com

## EXECUTIVE POSITIONING

**PMP and Prosci certified.** I lead service transformation where customer experience, product strategy, and technology weave together.

Much of my work has happened inside service organizations: a Salesforce Service Cloud service department measured on average handle time, first contact resolution, and omnichannel workforce management, and the frontline staff behind those numbers. I connect what support actually sees to what gets built, and I work alongside engineering, which is how recommendations get built.

On a \$2.1B services platform that combination cut support ticket volume 75% and moved onboarding success from 33% to 99.9%.

## CORE CAPABILITIES

- **Contact Center and Service Operations.** Average Handle Time (AHT) · First Contact Resolution (FCR) · Omnichannel Workforce Management (WFM) · Salesforce Service Cloud · Support Ticket Root-Cause Analysis · Customer Success
- **Research and Discovery.** Qualitative Interview Programs · Usability Testing · User Experience Research · Journey Mapping · Service Blueprinting · Discovery Sessions and Functional Requirements · Affinity Mapping
- **Design and Accessibility.** Human-Centered Design · Information Architecture · Wireframes, Mock-Ups, and Prototyping · Web Content Accessibility Guidelines (WCAG) and Americans with Disabilities Act (ADA) conformance · Design Systems · Figma, FigJam, Miro
- **Transformation and Team Leadership.** Organizational Change, Prosci Certified Change Management Practitioner (CMP) · Stakeholder Facilitation · Product Strategy and Roadmapping · Mentoring in Human-Centered Design · Client Account Leadership · Adoption Metrics and Measurement
- **Technical Fluency.** Salesforce (Service Cloud, Experience Cloud, Communities, Flow, object architecture) · SQL and relational, object-based data models · HTML and CSS · MuleSoft · Snowflake · Tableau and Power BI · Familiar with component-based UI frameworks including AngularJS, React, and Vue.js, at the level needed to collaborate with engineers rather than build alongside them

## SIGNATURE OUTCOMES

75% reduction in support ticket volume · 33% to 99.9% onboarding success · 545% user growth in four months · \$2.1B program, 23 applications, 7 directorates, 30,000+ users · 2023 California Government Technology Innovation Award

## EXPERIENCE

UpStart-Labs, LLC

Oct 2024 to Present

**Founder, Director of Product Design and AI Transformation** · North Conway, NH · Remote-Hybrid

Independent consulting practice covering service modernization, customer experience, and technology adoption, alongside executive keynote and teaching work.

Representative engagements:

- **Miami-Dade County Tax Portal Modernization** (Lead UX Strategist, summer 2026). Brought in two weeks from launch after the dev team had shipped every Phase 1 story on spec and the client was still unhappy. Ran discovery to find out why, then delivered 25 user stories (144 points) as a Salesforce Experience Cloud prototype covering business registration, return filing, and payment, built to the county Digital Design System standards with automated accessibility audits. Rebuilt concurrently with that team so nothing needed a second pass. The client, the project manager, and the dev team all signed off, and the referring firm asked for another engagement.
- **Thani Biotechnologies** (Principal Product Designer and AI Enablement Strategist, 2025 to Present). Runs discovery and product strategy for a pre-commercial biotech platform, including a 70-page product-market-fit document delivered in one week that the CEO used to secure \$5M in initial investor funding.
- **HealthTech Venture, NDA** (Principal Product Designer and AI Strategist, 2025 to Present). Leads product strategy and experience design for a multi-sided marketplace, and builds the training and support infrastructure for a non-technical founding team.
- **NH Tech Alliance AI Task Force** (Strategic AI Adoption Chair, independent advisory, 2026 to Present). The role did not exist before; the board president created it after recognizing the gap. Built the strategic roadmap carrying the Task Force from formation to a state-level AI adoption report, coordinating across business, government, and education verticals.

Sikich, LLP

Apr 2022 to Nov 2024

**Lead Product Designer and CX Solution Architect** · Remote · Contract

National professional services firm. Reported to the Director of Customer Success, previously Deputy Director of Response at the California Governor's Office of Emergency Services (Cal OES), a governor-appointed position.

The Cal OES Engage Community Portal is a \$2.1B disaster grants program spanning 23 mission-critical applications across seven directorates for more than 30,000 users.

## Primary client engagements:

- **Cal OES Engage Community Portal** (Lead Product Designer and Product Manager, Customer Success)
  - Held a standing seat in the Scrum of Scrums across a multi-vendor program: influence across all 23 applications, deep product and research work on ten of them (Public Assistance, REAL, MARS, HMA, HAMRRS, CWMP, LEMA, FAST, Debris, and the Resource Requesting System), and sole ownership of Public Assistance Closeout
  - Worked inside the Engage Salesforce Service Cloud service department analyzing user issues against average handle time, first contact resolution, and omnichannel workforce management, then traced the highest-volume contact drivers back to the platform conditions causing them. Support ticket volume fell 75%
  - Led the customer success function across all seven directorates, connecting what support and frontline staff saw to the product backlog rather than letting it stop at a service dashboard
  - Diagnosed a broken onboarding path on an application outside my assignment and moved success at that step from 33% to 99.9% using four low-effort Salesforce redirect changes the dev team took into the active sprint. The fix carried across all 23 applications and the active user base grew 545% in four months
  - Cut workflow time across the service portfolio: tribal coordination mass email went from three hours to three minutes for 109 federally recognized tribes, a resource requesting system was stood up in 72 hours at the onset of COVID and carried 1,000+ agencies and 140,000+ fulfilled orders across 25+ integrations, and the mutual aid platform reached 8,868 users across 630 local fire agencies processing \$185.8M in invoices
  - Conducted 350+ hours of qualitative interviews with end users, product owners, and executives, synthesized into affinity maps, journey maps, and visual playbooks that drove executive decisions
  - Built the visualization layer for the Governor's disaster response dashboards in Tableau and Power BI, working inside a team pipeline spanning MuleSoft, Snowflake, and Databricks
  - Established the human-centered Office of Change Management (OCM), served as its interim lead alongside interim lead of the Project Management Office (PMO), built and mentored a three-person team, and stood up a SharePoint hub to train product owners. Three additional directorates signed onto the platform within months
  - Owned the program portfolio inventory that made a 20-application program legible to executives, and produced the executive presentation deck and 20 program one-sheets from it
  - Cut 71% of the story-point budget out of the Public Assistance Closeout application by resolving a scope problem with the product owner before it reached the sprint. It won the 2023 California Government Technology Innovation Award for Best Application Serving the Public
- **Customer Success and AI Copilot Team** (Lead Experience Designer)
  - Selected from more than 2,000 Sikich employees for Microsoft's enterprise Copilot beta, then authored the firm's internal governance and workflow guidelines and taught AI-assisted research and prototyping methods to the internal team
- **California Employment Development Department (EDD) Salesforce Training Hub** (Project Manager)
  - Built a Learning Management System (LMS) and onboarding automation hub to certify 33 new hires in weeks across Slack, Microsoft 365, Azure, and Salesforce Sandbox. 82% enrolled in the certification exam

Alexis Design, LLC

Jan 2000 to Oct 2024

**Founder, Principal Product Designer and Strategist** · Providence, RI and North Conway, NH

Ran a design and strategy firm for 24 years with employees, vendors, and subcontractors, owning client relationships, budgets, and delivery simultaneously.

- Delivered across HealthTech, FinTech, EdTech, GovTech, and public sector, including Brown University Health, Lifespan, Mallinckrodt Medical, IMCERA Medical, Gilbane Construction, the Massachusetts Department of Transportation, the Rhode Island Convention Center Authority, TF Green Airport, the American Red Cross, Providence Charter Schools, and Johnson & Wales University, with 92% stakeholder buy-in across technical and non-technical audiences
- Designed and ran an employee enrichment program for Johnson & Wales University's Providence campus executive office, built from staff feedback and reshaped each term. Retained seven consecutive semesters with enrollment growing 3x. 10+ industry awards and national publications

## CREDENTIALS AND PROFESSIONAL LEADERSHIP
